COMP 3700 Small Project 4 : jQuery

20 Points

Due: October 18, 2023

To the extent possible, translate your Small Project 3 JavaScript code to jQuery. If you want to play around with other jQuery features, feel free to make additional changes to the content, styling and dynamics of the site.   **(15 points)**

Add comments at the top of your program to answer these questions: **(5 points)**

1. Do you think your jQuery code is easier to read than the corresponding (pure) JavaScript code, or harder? Why?
2. Is your jQuery program shorter than the corresponding (pure) JavaScript program?
3. Are your answers to the above questions typical for comparisons of jQuery versus JavaScript in general? Why or why not?

Use the Google-hosted jQuery library by including the following in your HTML file:

```
<script
src="https://ajax.googleapis.com/ajax/libs/jquery/3.6.0/jquery.min.js">
</script>
```

This is also shown on page 355 of Duckett, except that one is an older version.

Publish this in a project 4 folder on the course web server.
