

COMP 3700 Technical Presentation

Fall 2025

50 points

You each will select a partner and together give a 30 minute presentation to the class on a relevant course topic. This time can go pretty quickly, as you will probably want to include live coding demos. I will list topics below but you may propose something different.

Presentations can start as soon as week 5, depending on the topics selected.

Here are the pre-approved topics, in approximate order:

1. JavaScript: Functions, Methods and Objects
2. JavaScript: Document Object Model (DOM)
3. JavaScript: Events
4. jQuery
5. XML & JSON
6. Node.js
7. React.js
8. AngularJS
9. Vue.js
10. Ember JS
11. Express.js
12. Django
13. Flask
14. Dash
15. Docker
16. Azure
17. AWS

Spend the next couple days researching these topics, and send me your **top three choices** (or propose another topic) by **Monday, September 8**.
